Process Journal

Process Journal

- Plan. Make a gameboy and a frog out of the pieces I chose. I have no idea what the third build is gonna be yet

- Duplication trick with Move tool is not working and its costing me alot of time.

- figured it out I was being dumb thank god I got it

- Actually building it in sketchup is the worst part just snap on there like in real life

- Just finished the gameboy and its fucking sick

- gonna do the instructions now so I can copy paste the page design for my other builds

- Ive decided to go the hard route and make it look like real Lego instructions

- THE INSTRUCTIONS LOOK SICK

- super proud of myself, on to the next build

- Just snap in place!!!!!

- Tape Measure is not clutching

- Aww my frog looks cute I like it

- Good idea on doing the instructions earlier

- NO clue what my last one is gonna be

- Okay, I made a T.V/B.M.O from adventure time type of thing I think it works

- This assignment is so cool

- Finished finally

- overall really happy with the way everything came out
